

Business Analytics

Dr. Holger Steinmetz Lehrstuhl für Unternehmensführung Universität Trier

Gegenstand Vorlesung

• (Vorläufiger Inhalts- und Zeitplan):

https://shorturl.at/akmo0

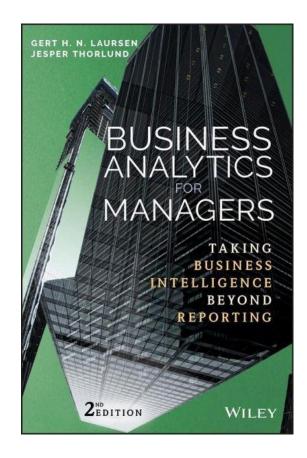

Leistungsanforderungen I

- Vortrag in der Vorlesung über einen analytischen Ansatz
 - 45-60 min.
 - Funktionsweise (Prinzip)
 - Beispiele aus Forschung und Praxis
 - Demonstration in R:
 - Vorstellung eines selbst gesuchten Datensatzes (z.B. über Kaggle.com)
 - Erstellung einiger Aufgaben der Exploration und des Data Cleanings für die Anwesenden
 - Demonstration des analytischen Ansatzes anhand des Datensatzes
 - Generierung von 1-2 zusätzlichen Aufgaben für die Anwesenden

Literatur: Business Analytics

- Grundlage für die ersten beiden Vorlesungen
- Weitere:

Tipps für die eigene Einarbeitung

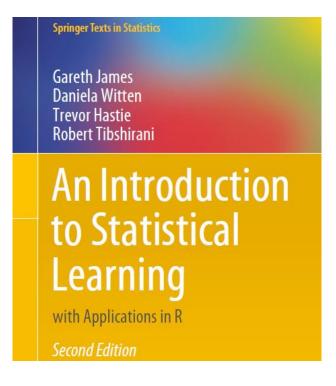

| Classification |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| • Qualitative variables take values in an unordered set \mathcal{C} , such as: |
| $\begin{array}{ll} \mathtt{eye} & \mathtt{color} \in \{\mathtt{brown}, \mathtt{blue}, \mathtt{green}\} \\ \mathtt{email} \in \{\mathtt{spam}, \mathtt{ham}\}. \end{array}$ |
| • Given a feature vector X and a qualitative response Y taking values in the set \mathcal{C} , the classification task is to build a function $C(X)$ that takes as and predicts its value for Y ; i. $\in \mathcal{C}$. |
| • Often we are more interested in that X belongs to each categor that X belongs to each categor. |

| 1 | Introduction | |
|---|--------------------------------------------------------------------|----|
| | 1.2 Begriffe | |
| 2 | Statistical learning | 2 |
| | 2.1 What is statistical learning? | |
| | 2.2 Assessing Model Accuracy (29) | 5 |
| 3 | Linear Regression | 12 |
| | 3.1 Simple Linear Regression (60) | 12 |
| | 3.2 Multiple Linear Regression (71) | |
| | 3.3 Other Considerations in the Regression Model | 14 |
| | 3.4 The Marketing Plan (103) | 16 |
| | 3.5 Comparison of Linear Regression with K-Nearest Neighbors (105) | 16 |
| 4 | Classification (129) | 18 |
| | 4.1 An Overview of Classification | 18 |
| | 4.2 Why not Linear Regression? (131) | 19 |
| | 4.3 Logistic Regression (133) | 19 |
| | 4.4 Generative Models for Classification (141) | 23 |
| | 4.5 A Comparison of Classification Methods (158) | 31 |
| | 4.6 Generalized Linear Models (164) | 35 |
| 5 | Resampling Methods | 38 |
| | 5.1 Cross validation (198) | 38 |
| | 5.2 The bootstrap (209) | 43 |
| 6 | Linear model selection and regularization (225) | 45 |
| • | 6.1 Subset selection | |
| | 6.2 Shrinkage Models: Ridge regression and LASSO (237) | 50 |

 Tibshirani (<u>Link</u> zur playlist)

2. Mein Skript des Buches

- 3. Nachlesen im Buch
- Bei Unverständnis im Skript
- Für Euren Ansatz entsprechendes Kapitel natürlich Pflicht

Literatur: R, Tidyverse und Tidymodels

O'REILLY

Tidy Modeling with R

A Framework for Modeling in the Tidyverse

• R / Tidyverse

Online-Buch: "R for graduate students":
 https://bookdown.org/yih_huynh/Guide-to-R-Book/

• Machine learning / tidymodels

- Zum Start: Blogartikel von Rebecca Barter:
 https://www.rebeccabarter.com/blog/2020-03-25_machine_learning/
- Ebenfalls: Eigenes Skript
- Kuhn, M., & Silge, J. (2022). Tidy Modeling with R. O'Reilly Media,
 Inc. www.tmwr.org
- Vielleicht am Wichtigsten: Youtube channel von Julia Silge (machine learning mit tidymodels): https://www.youtube.com/@JuliaSilge
